☐

day and night are equally as long

☐

Orion is above our head

☐

day is the longest of the year

☐

night is the longest of the year

Question 14 5 pts

The summer triangle does not include this star (see my slides)

☐

sirius

☐

deneb

☐

vega

☐

altair

Question 15 5 pts

Without an erecting eye piece added to binoculars (or to a telescope meant to observe buildings)

☐

images are upside down

☐

there is chromatic aberration

☐

image are black and white

☐

images are totally blurred

☐

Question 16 5 pts

The planets are observed along an imaginary line called the

☐

the ecliptic line

☐

the solstice line

☐

the mystic line

☐

the seasonal line

☐

Question 17 5 pts

The teapot and the stinger of the scorpius point to

☐

the center of our galaxy

☐

polaris

☐

andromeda galaxy

sirius

orion nebula

Question 18 5 pts

The rays coming from a far away objects are parallel

ldk

false

true

Question 19 5 pts

This is the constellation of

orion

cygnus

Cassiopeia

taurus

andromeda
