

assignment1 - Tour of the class

 This is a preview of the published version of the quiz

Started: Mar 22 at 7:17pm

Quiz Instructions

You have 2 attempts. I keep the latest grade.

Question 1 4 pts

goto <https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram> 
(<https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram>)

Hover your mouse over the pictures.

The virgo supercluster contains about

500,000 galaxies

50,000 galaxies

10,000 galaxies

1000 galaxies

Question 2 3.5 pts

goto <https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram> 
(<https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram>)

Hover the mouse over the pictures.

The solar system includes

100s of dwarf planets

there is not such objects

only one and ii is PLuton

10s of dwarf planets

Question 3 3.5 pts

The closest star proxima centauri is about .. light years away

☐

400 L.Y

☐

40 L.Y.

☐

4000 L.Y

☐

4 L.Y

Question 4 3.5 pts

Which planet was demoted from planethood

☐

Eris

☐

Neptune

☐

Jupiter

☐

Pluto

Question 5 3.5 pts

The Meteor crater (Arizona) was created instantly when a 50-meter (164-foot), 150,000-ton meteorite slammed into the desert about 50,000 years ago. It is preserved

☐

Because it was protected by the national park

☐

Because there was no one living there for a long time

☐

Because of the dry weather

☐

Because it is constantly bombarded by meteorites

Question 6 3.5 pts

who proposed a heciocentric system but wait to be about to die before publishing his book?

(he didn;t like the idea to be burnt at stake)

☐

Galileo Galilei

☐

Newton

☐

Cecilia Payne

☐

Copernicus

Question 7 3.5 pts

Unit 1.1 We see Andromeda galaxy as it

☐

as it is now as we speak

☐

will be in 2.5 million years ago

☐

was 2.5 millions years a go

☐

Too tired to review the slides

Question 8 3.5 pts

Who proposed that the stars were mostly made of hydrogen?

For her PhD thesis (Harvard)?

This was against the advice of the PhD advisor.

☐

Galileo Galilei

☐

Cecilia Payne

☐

Copernicus

☐

Kepler

Question 9 3.5 pts

Which of the choices below correctly lists things in order from largest to smallest?

☐

Solar System, Local Group, Universe, Milky Way

☐

Universe, Local Group, Milky Way, Solar System

☐

Local Group, Solar System, Milky Way, Universe

Milky Way, Universe, Solar System, Local Group

Universe, Milky Way, Local Group, Solar System

Question 10 3.5 pts

During our first lecture, we used the website:

<https://www.timeanddate.com/astronomy/night/usa/miami>

<https://www.timeanddate.com/astronomy/night/usa/miami>

Stars seems to (in the Northern hemisphere)

you can click on the link. And see how stars behave as the time passes by.

rise in the WEst and set in the East

stars don't move. they are static

Rise from the South and set in the North

rise from the east and set in the West

Question 11 3.5 pts

M87 is a special galaxy in the virgo cluster. This is because the first picture of a _____ found in the galaxy was taken by a radio telescope (in 2017). I showed the picture in class, It lead to a nobel prize in 2020

neutron star

black hole

white dwarf

exoplanet

Question 12 3.5 pts

One light-year is the distance light travels in one year. The speed of light is about 300,000 km/s (3×10^5 km/s). How far away is one light-year?

hint: in one year you have about 3.14×10^7 seconds (31,400,000s). If the light travels 300,000 km in one second then in 31,400,000s, it travels:

about (forget the decimal)

☐

1×10^9 km (1,000,000,000km)

☐

9×10^{12} km (9,000,000,000,000km)

☐

3×10^5 km (300,000 km)

☐

2×10^7 km (20,000,000 km)

☐

Question 13 3.5 pts

go to <https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram>

Look for the term solar system and answer the question. The 2 comet regions are

☐

Oort cloud and Kuiper belt

☐

asteroid belt and kuiper belt

☐

local group and virgo cluster

☐

Oort cloud and asteroid belt

☐

Question 14 3.5 pts

goto <https://quizlet.com/220003127/astronomy-intro-our-place-in-the-universe-diagram>

hover above the milky way. It contains about stars like our sun

☐

100s billion stars

☐

100s stars

☐

100s trillion stars

☐

100s million stars

☐

Question 15 3.5 pts

We know so much about our Universe because

☐

we build models in labs of stars

☐

we analyse the light coming from objects in space

☐

we analyze the sound coming from space

☐

we go to hardware stores and buy stars

Question 16 3.5 pts

This amazing picture of ----- was taken by -----

<https://apod.nasa.gov/apod/ap220720.html>

☐

Pluto, JWT

☐

Jupiter, JWT

☐

Proxima, Hubble

☐

M87 , Hubble

Question 17 3.5 pts

The stars produce energy through (for most of their life)

☐

fusion of hydrogen to helium

☐

fission of uranium

☐

burning gasoline

☐

burning coal

Question 18 3.5 pts

How many planets in the solar system TODAY (officially and very sadly)

☐

10

☐

7

☐

8

☐

9

Question 19 3.5 pts

The Universe is

☐

shrinking

☐

we don't know

☐

not moving

☐

expanding

Question 20 3.5 pts

Which statement is true

☐

All stars have the same lifetime

☐

massive, blue stars die young

☐

Stars don't die

☐

Small stars die young

Question 21 3.5 pts

Etienne Klein, a French Physicist, posted a picture of Proxima taken by the JWT (James Webb Telescope). The picture (it was a joke. See my slides)

☐

was a slice of chorizo

☐

was a picture of the star in visible light

☐

was actually a picture of Jupiter

☐

was actually a picture of our Sun with red filter

Question 22 3.5 pts

What makes 75% of the Universe

☐

gas and dust

☐

dark matter

☐

dark energy

planets and stars

Question 23 3.5 pts

The Arecibo telescope

there is no such thing

is broken

is well and kicking

IDK

Question 24 4 pts

We see the Andromeda galaxy (the only galaxy we can see with the naked eye) as

it was 2,000 years ago

it will be in 2.5 million years from now

it is now

it was 2.5 million years ago

Question 25 4 pts

Who proposed the heliocentric system (the Sun at the center) but waited to be in his death bed before publishing it

(he didn't like the idea to be burn at stake).

Isaac Newton

Johannes Kepler

Galileo Galilei

Nicolaus Copernicus

Question 26 1 pts

Which constellation is named after a "vain queen" (hint: makes a W)

☐

Cleopatra

☐

Cassiopeia

☐

Andromeda

☐

Elizabeth I

Question 27 5 pts

The big dipper, easily seen with a pair of binoculars, is an asterism and is part of the constellation

You can check the map

<https://www.timeanddate.com/astronomy/night/usa/miami>

(<https://www.timeanddate.com/astronomy/night/usa/miami>)

NE at 11PM

☐

Andromeda

☐

ursa major (big bear)

☐

ursa minor (little bear)

☐

Orion (the hunter)

Question 28 5 pts

The radio telescope that detected the first exoplanets around a pulsar was

hint: Puerto Rico

☐

hubble telescope

☐

KAIT telescope

☐

James Webb telescope

☐

arecibo telescope

Question 29 4 pts

In class of the picture of blackhole taken in 2017.

<https://www.sciencealert.com/black-hole-telescope-makes-record-observations-from-earths-surface>  (<https://www.sciencealert.com/black-hole-telescope-makes-record-observations-from-earths-surface>).

the picture was taken by

☐

a network of radio telescopes connected to each other

☐

the BH do not exist.

☐

the james webb telescope

☐

the hubble space telescope
