

assignment3 - History2

 This is a preview of the published version of the quiz

Started: Mar 22 at 7:19pm

Quiz Instructions

Don't rush. you can start and wait for the next lecture 2 attempts

Question 1 3 pts

The space-time can be curved by masses (such as black holes) according to

☐

3 laws of motion

☐

special relativity

☐

law of universal gravitation

☐

general relativity

Question 2 3 pts

General relativity was experimently proven during

☐

halley's comet visit

☐

a meteor shower

☐

the collpase of a massive star

☐

a solar eclipse

Question 3 5 pts

The Halley's comet could be seen in a painting by the famous painter

☐

Michelangelo

☐

Giotto

Botticelli

Da Vinci

Question 4 5 pts

red light has a lower frequency than blue light. If a galaxy moves toward our milky way. It will be (as observed by us)

blueshifted

Can't be determined

redshifted

no change in color

Question 5 5 pts

A source of sound is moving toward you at great speed. Its pitch as observed by you (frequency of the sound)

increases as it moves

Idk

decreases as it moves

stays the same

Question 6 5 pts

Herschel discovered Uranus. it was first called the Georgian Planet . Named after

the famous Monkey named George

The state Georgia

the king of England

The country Georgia

Question 7 5 pts

Who was assisting Hershell with the buiding of his telescopes

☐

his mom

☐

his wife

☐

his sister

☐

his brother

Question 8 5 pts

Halley's comet has a period of about (time for one cycle)

☐

5 years

☐

10 years

☐

70 years

☐

120 years

Question 9 3 pts

Who is considered as the father of the modern Astronomy and built the first very large telescope sponsored by a king (started as a musician in a military band. He cataloged star clusters. Observed sun spots. Observed the milky way)

☐

William Hershel

☐

Edwin Hubble

☐

Albert Einstein

☐

Isaac Newton

Question 10 5 pts

During the eclipse if 1919 the light of a star was deflected by the presence of

☐

Halley comet

☐

Venus

Jupiter

our Sun

Question 11 5 pts

Halley's comet

has a circular orbit

slows down when passing by the Sun

moves at a constant speed along its orbit

speeds up when passing by the Sun

Question 12 5 pts

In class, I mentioned that nothing can go faster than the speed of light except

Halley's comet (ghost of Halley pushing it)

Subparticles observed in the lab

The universe itself (after the big bang)

Gravitational waves in the fabric of space-time

Question 13 5 pts

We watched a video about Hershell in class. He crafted himself

mirrors out of pieces of metal

giant lenses out of melted sand

instrument of music

dishes to collect radio signals

Question 14 5 pts

The weight of an elephant is 400 pounds on Earth (distance R from the center of the Earth. If the elephant is in orbit at a distance $2R$ from the center of the Earth, its weight is now

(its an inverse square law)

☐

200 pounds

☐

400 pounds

☐

300 pounds

☐

100 pounds

Question 15 5 pts

Newton built the first _____ telescope

☐

reflecting

☐

space telescope

☐

He didn't build anything.

☐

refracting

Question 16 5 pts

Newton understood that the Moon is falling toward the Earth but never reaches it

☐

True

☐

False

☐

I fell asleep

☐

I missed the class

Question 17 5 pts

Who called his colleage spherical b** because they were b** all the way around ?

Incidently, he also predicted dark matter based ob servations

☐

Fritz Zwicky

☐

Edwin Hubble

☐

Isaac Newton

Willam Hershell

Question 18 5 pts

A skater spins faster when pulling the arms in (no friction). This is conservation of

mass

momentum (or spin)

I missed the class

energy

Question 19 5 pts

Who lost his nose during a dual with a fellow mathematician?

(was the boss of Kepler)

Tycho Brahe

Nicolaus Copernicus

Galileo Galilei

Johannes Kepler

Question 20 4 pts

In the movie Golden eyes, which telescope is featured?

Arecibo telescope

Mount Wilson telescope

The event horizon telescope

James Webb telescope

Question 21 4 pts

In 2006, the bullet cluster gave direct proof of

- ☐ black holes
- ☐ worm holes
- ☐ dark energy
- ☐ dark matter

Question 22 1 pts

Light (optical and IR) from the big bang has been stretched out over the 14 billion years of the Universe existence and is now in the _____ range

- ☐ Infra red
- ☐ AM
- ☐ UV light
- ☐ microwave

Question 23 4 pts

Today, we think the Universe is

- ☐ collapsing
- ☐ moving at a constant rate
- ☐ decelerating
- ☐ accelerating

Question 24 4 pts

Which telescope discovered the first planets (1992) around a pulsar (ugly neutron star)?

☐

☐

arecibo telescope

☐

Mount Wilson observatory

☐

new event horizon

☐

Very Large Telescope

⋮

Question 25 2 pts

Newton's developed his Universal law of gravitation and his law of motion during an outbreak of

(professors and students were sent home. So he had time to think about the laws of nature)

☐

covid

☐

pleague

☐

leprosy

☐

smallpox

☐

malaria

⋮

Question 26 2 pts

surprisingly, Newton was not knighted because of his groundbreaking work in the domain of Physics but because

☐

he was efficient at reducing the problem of counterfeiting in England

☐

He invented Calculus

☐

He was knighted thanks to his well connected friend Halley

☐

He was an alchemist and changed lead to gold

⋮

Question 27 2 pts

"if I have seen further [than others], it is by standing on the shoulders of giants."

This is a famous quote by

☐

Tycho Brahe

☐

Johannes Kepler

☐

Galileo Galilei

☐

Nicolaus Copernicus

☐

Isaac Newton
