➞ [_ \(https://www.sciencealert.com/nasa-confirms-6000-planets-beyond-our-solar-system-discovered\)](https://www.sciencealert.com/nasa-confirms-6000-planets-beyond-our-solar-system-discovered)

☐

a sun like star

☐

a pulsar

☐

a black hole

☐

a protostar

Question 2 14.5 pts

The after glow of the big bang is detected in the ----- part of the electromagnetic spectrum

☐

gamma rays

☐

infra red

☐

microwave

☐

visible

Question 3 14.5 pts

We watched a video of the discovery by Penzias and Wilson. A pair of pigeons was a nuisance for their experiment. What did they do?

☐

they did nothing to them

☐

they asked them to leave

☐

they sent them to california

☐

they brought a shotgun

Question 4 14.5 pts

Gravitationnal waves were detected using two detectors (in Louisana and Washington).

<https://www.ligo.caltech.edu/page/what-are-gw> ➞ [_ \(https://www.ligo.caltech.edu/page/what-are-gw\)](https://www.ligo.caltech.edu/page/what-are-gw)

In class we watched a video about it.

The two detectors used can detect

- ☐ photons emitted by the big bang
- ☐ gamma rays burst
- ☐ the ghost of Kepler at one of the foci of the obital motion of Halley comet
- ☐ the squeezing and stretching of the fabric of space time

Question 5 15 pts

Since 1998 we know that the Universe (2011 Nobel Prize)

- ☐ is oscillating
- ☐ is slowing down
- ☐ is accelerating
- ☐ is static

Question 6 15 pts

We watched a video about the bullet cluster. It consists of 2 clusters of galaxies that collided with each other 100–200 million years ago, In pink you can see the hot intracluster gas that collided while the heavier galaxies kept moving. And in blue you can visualize (as explained in video)

- ☐ a strange glow

☐

more gas

☐

dark energy

☐

dark matter

Question 7 15 pts

Who predicted neutron stars.

hint: He would call his colleagues spherical b*. Because they are b* all the way around

☐

Alex Fillipenko

☐

Arno Penzias

☐

George Gamow

☐

Fritz Zwicky

Question 8 10 pts

In the header I have a gif/

It represents

☐

gamma rays busts.

☐

water waves

☐

sound waves

☐

gravitational waves

Question 9 2 pts

To derive his laws of planetary motion. Kepler used the position of _____ as seen from Earth

☐

Mars

☐

PLuto

☐

Venus

☐

Mercury

Question 10 2 pts

Our local group belongs to

☐

virgo supercluster

☐

oort cloud

☐

milky way

☐

Kuiper belt

Question 11 2 pts

Jupiter galilean moons does Jupiter have

☐

2

☐

1

☐

4

☐

3

Question 12 2 pts

In 1993 arecibo telescope detected the first exoplanets around

☐

a red dwarf

☐

a black hole

☐

a sun like star

☐

a pulsar
