Quiz Instructions

Question 1 20 pts

How did Kepler got the data with position of Mars as seen from Earth

☐

Galileo Had compiled the position of Mars in his last publication.

☐

He stole the data from Tycho Brahe

☐

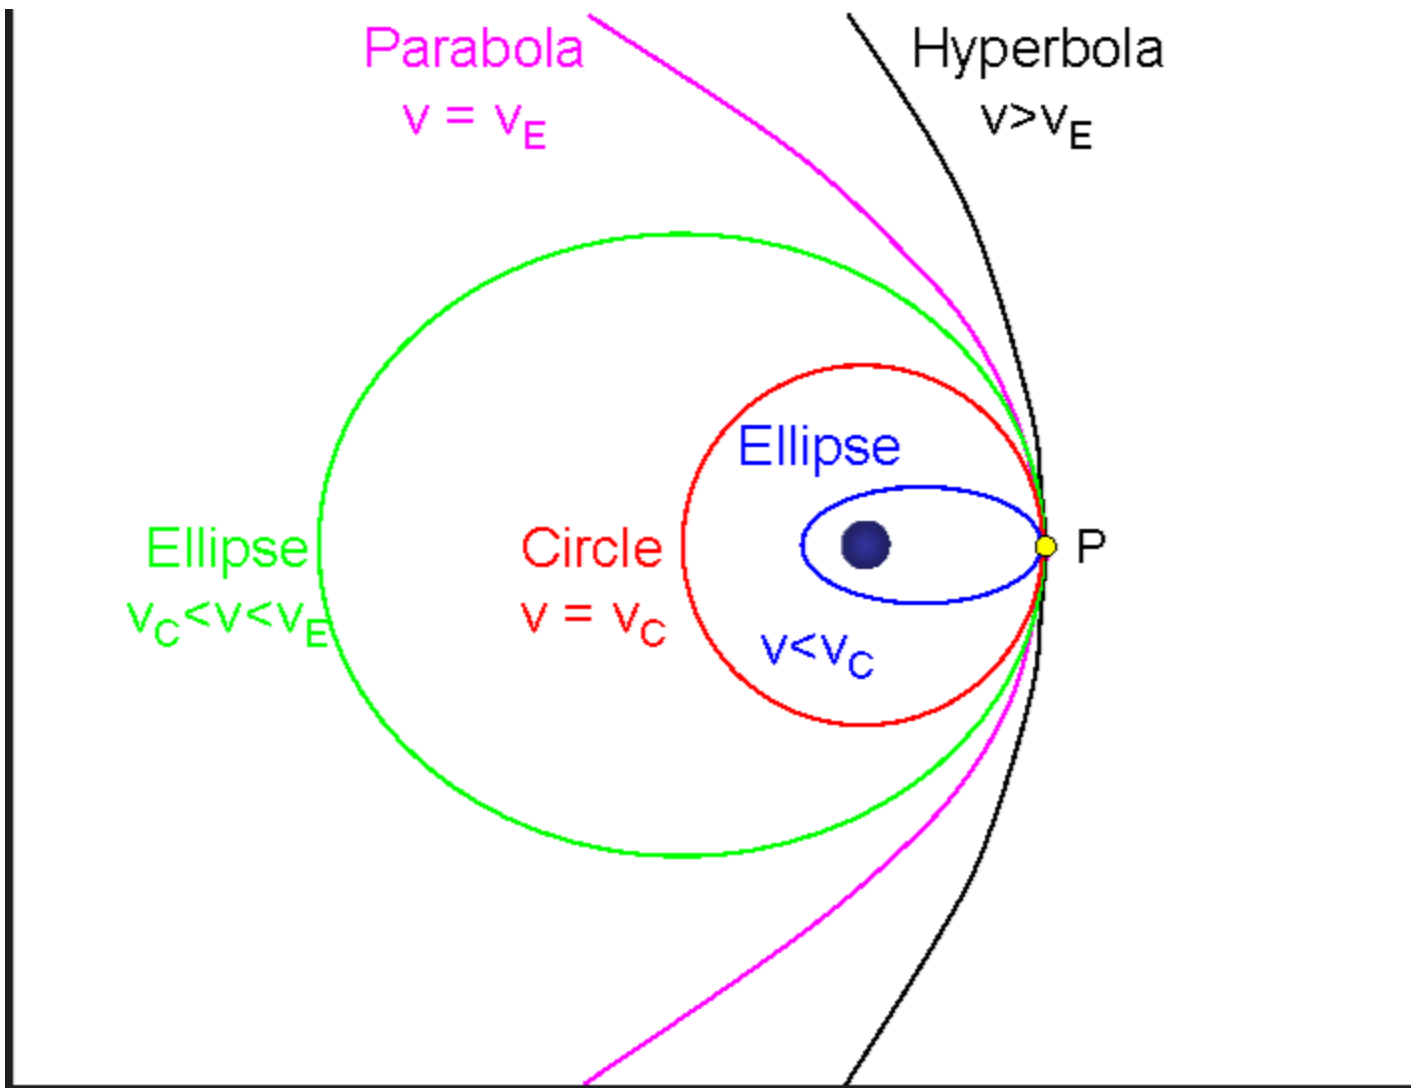

Tycho Brahe gave him all the data

☐

He did the astronomical observations himself.

Question 2 20 pts

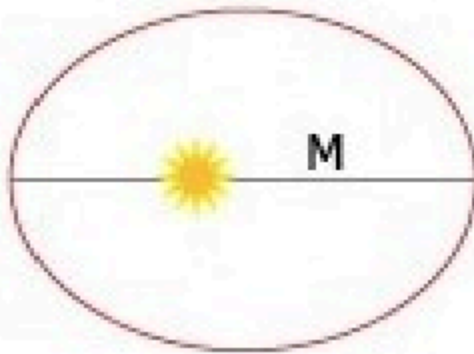

These are the possible trajectories for an object under the influence of gravity in a two-bodies problem. These are called (hint: named after a geometric shape. (ancient Greek study of geometry)

- ☐ conics
- ☐ cubics
- ☐ cylindrics
- ☐ polygonics

Question 3 20 pts

3rd Law

P:

M:

P^2/M^3 is the same for all planets

This is Kepler's third law.

P

☐

is the time it takes for a planet to complete its orbit

☐

its the distance between the Sun and the planet

☐

its the distance between the two foci of an ellipse

☐

is the vertical size of an ellipse

⋮

Question 4 20 pts

Kepler first law says that planets of the solar system follow ellipses and that

☐

the sun oscillates between the two foci

☐

the earth is at one of the foci

☐

the ghost of Kepler is at on of the foci

☐

the Sun is at one of of the foci

⋮

Question 5 20 pts

Newton said the Moon is falling toward the Earth.

☐

IDK

☐

This is True

☐

This is false

☐

I don't listen in class

Question 6 20 pts

Newton described his three laws of motion and the law of universal gravitation in:

(published in 1687 and is considered one of the most important works in the history of science, providing the mathematical framework for classical mechanics and significantly advancing our understanding of the physical universe)

☐

De revolutionibus orbium coelestium" This translates from Latin to "On the Revolutions of the Heavenly Spheres."

☐

Siderius nuncius (Starry Messenger)

☐

Harmonices Mundi (harmony of the worlds)

☐

Principia (Philosophiæ Naturalis Principia Mathematica)

Question 7 20 pts

Newton

☐

was not into hands-on experiments

☐

invented the reflecting telescope

☐

invented the refracting telescope

☐

invented binoculars

Question 8 20 pts

If you are 400 pounds on Earth (distance 1 R from the center of the Earth). At a distance of 2R from the earth, you weight is now

☐

200 pounds

☐

100 pounds

☐

400 pounds

☐

0

Question 9 20 pts

Newton was a professor at Trinity College. A college at Cambridge University. He was sent home for one year. 1665-1666. Considered as Newton's "annus mirabilis" or "year of wonders."

Because

☐

University was bankrupt

☐

It was COVID-65

☐

It was the great pleague of London

☐

Newton lost his mind for a year

Question 10 20 pts

Kepler had to leave Germany (Holy Roman Empire) to go to Prague

☐

because he was protestant

☐

because his mom was trialed for witchcraft

☐

because he followed his mentor Tycho Brahe

☐

Because he was given his own island to observe the sky

Question 11 20 pts

Who was given an island to observe the sky by the king of Denmark?

(He collected position of Mars in the sky)

☐

Johannes Kepler

☐

Nicolaus Copernicus

☐

Tycho Brahe

☐

Galileo Galilei
