

test 3 - solar system and cosmic collisions ↕

! This is a preview of the published version of the quiz

Started: Apr 7 at 12:28pm

Quiz Instructions

1 attempt. you can not see the right answer. OPEN book.

I am referring to the video:

<https://www.youtube.com/watch?v=4Wrc4fHSCpw>  (<https://www.youtube.com/watch?v=4Wrc4fHSCpw>)

<https://www.youtube.com/watch?v=4Wrc4fHSCpw>

Question 1 5 pts

The meteorite that killed the dinosaurs was about _____ in size

☐

1km

☐

5km

☐

100m

☐

10km

Question 2 5 pts

Which of the following planets cannot be seen with the naked eye?

☐

Jupiter

☐

Neptune

☐

Venus

☐

Saturn

☐

Mars

Question 3 5 pts

The comet that "caused" mass suicide in 1997 is

☐

Comet Hale-Bopp.

☐

shoemaker-levy 9

☐

Halley comet

☐

Comet Hyakutake

Question 4 5 pts

In the video we watched (*these asteriods to worry about-* veritasium) you learn that the probability to be hit by a 10km wide comet in the coming 100 years is about

☐

5%

☐

100%

☐

0

☐

0.5%

Question 5 5 pts

Building on the previous question. At the end of the video, the question is asked. Can we do something to save the people of a city to be hit by a big meteorite (on short notice)

See lecture: cosmic collision or video of veritasium. meteorites we worry about

☐

we could blow the meteorite with a H-bomb

☐

we could wrap the meteorite with aluminum foil and use the solar pressure

☐

we could deflect the meteorite with a spacecraft

☐

none of these could work

☐

we could evacuate the city

Question 6 5 pts

What is Jupiter's Great Red Spot? (reference: short video we watched)

☐

a portion of strongly heated gas near the surface of Jupiter caused by a collision wi

☐

a giant crater on the surface of Jupiter

☐

reflected sunlight that is red for the same reason sunrises and sunsets are red on Earth

☐

a giant storm that is about twice as wide as the planet Earth

☐

a huge patch of sulfur in Jupiter's atmosphere

Question 7 5 pts

Which of the following indicates that past conditions on Mars may have been suitable for life

☐

Mars has been studied by numerous spacecraft, including both orbiters and landers

☐

Mars has two small Moons, Phobos, and Deimos.

☐

There are very large extinct volcanoes on Mars.

☐

Mars has polar caps.

☐

There are dried up riverbeds, rock-strewn floodplains, and minerals that form in water.

Question 8 5 pts

Which planet has the highest average surface temperature and why?

☐

Jupiter, because it is so big

☐

Venus, because of its dense carbon dioxide atmosphere

☐

Mercury, because it is closest to the Sun

Mars, because of its red color

Question 9 5 pts

Where are most asteroids found?

inside the orbit of Earth

in the Oort cloud

between the orbits of Jupiter and Saturn

between the orbits of Mars and Jupiter

Question 10 5 pts

Why would it not be a good idea to send a lander to one of the jovian planets?

The jovian planets are too far away.

There's too much risk of hitting a boulder in the planet's rings on the way down.

It would be impossible to slow the lander down sufficiently to avoid a catastrophic crash.

There is nothing interesting to find on the jovian planets.

The jovian planets have no solid surface to land on.

Question 11 5 pts

voyager 1 and 2 have a golden record with picture of a man and a woman with fetus inside, sound of birds, music, greeting in different language, Math equations

if you curious:

<https://voyager.jpl.nasa.gov/galleries/images-on-the-golden-record/>

there was no picture of a woman

This is true

there was no audio file

there was no greetings

there was no Math equation

Question 12 5 pts

How can a large asteroid impact in one spot on Earth affect the climate of the entire Earth?

The impact tears a hole in Earth's atmosphere, allowing heat energy to escape and thereby cooling our planet.

The impact releases greenhouse gases that immediately make Earth warmer.

The impact blasts debris into Earth's atmosphere that blocks sunlight, making Earth's surface cooler.

The impact blasts a hole through Earth's mantle, allowing hot metal from the core to rise up and heat the world.

Question 13 5 pts

Luis Alvarez and team found of then layer of _____ - worldwide (proof of a huge meteorite hitting the Earth)

sediments

uranium

iridium

iron

Question 14 4 pts

The "greeks" and the "troyans " share the same the same orbit as

Jupiter

Earth

Kuiper belt

Mars

Question 15 4 pts

In 2006, Ceres was promoted and is called a (a promotion)

planet

dwarf planet

centaur

Moon

Question 16 4 pts

Ref.: movie "asteroids we worry about". In 2013, a meteorite landed in a town in Russia. The damages done by the meteorite (injured persons, collapsing building) was due to

intense heat from the kinetic energy of the meteorite

sound shock wave

The burst equivalent to an atomic bomb

The crater that formed in the middle of the town.

Question 17 4 pts

Why was the Shoemaker-Levy 9 impact on Jupiter so important to astronomers?

It was the first event in modern history that was brighter than the full moon in the sky.

It wiped out the dinosaurs.

It was the first clear evidence that impacts really occur.

It confirmed our theory of solar system formation.

It dredged up material that allowed us to learn about Jupiter's interior.

Question 18 4 pts

A spacecraft was launched in 2021 to visit the trojans. It was named after

the comet with the largest period we know of

the oldest asteroid of the solar system

the smaller trojan asteroid

one of the most famous fossil in human evolution

**Question 19 4 pts**

We watched a video about the rovers on Mars. The scientists were frustrated because

☐

the mission to recover the samples has been postponed

☐

the rovers failed to collect samples

☐

no sign of life has been found

☐

the helicopter stopped working

**Question 20 4 pts**

A blood Moon happens

☐

When a rain of iron oxide falls on the Moon

☐

when the Moon is the closest to the Earth

☐

when the Earth is between the Sun and the Moon

☐

When the Sun is in high activity

**Question 21 5 pts**

The Great Hoax Moon was done by

☐

The Sun post

☐

A small tabloid

☐

Orson Wells

☐

New York Times

**Question 22 4 pts**

The Hoax of the century triggered mass hysteria. Some people believed that

☐

Martians were landing in NJ

☐

vulcans had landed in NYC

☐

Martians were bombing London

Venusians were attacking the Earth

Question 23 4 pts

in 2006 a 10th planet was found (for a short time). It was called Vulcan

False

True

Not saved
