Quiz Instructions

Question 1 4 pts

Which planet would float if placed in a huge ocean of water

☐

PLuto

☐

Saturn

☐

Neptune

☐

Uranus

Question 2 4 pts

Why don't most of the particles that make meteors actually reach the surface of Earth?

☐

They are deflected by the gravity of the Moon.

☐

They reflect off the atmosphere and return to space.

☐

They are too small and burn up in the atmosphere.

☐

They are deflected by the solar wind.

☐

They are too small and are slowed to a stop in the atmosphere.

Question 3 4 pts

Based on its orbit, Pluto is a large member of

☐

the Oort cloud.

☐

an extrasolar planetary system.

☐

the asteroid belt.

the moon system around Neptune.

the Kuiper belt.

Question 4 4 pts

Which characteristic listed below describes the jovian planets? (hint: slide)

slow rotational period

small masses

solid surfaces

close to the Sun

low density

Question 5 4 pts

What was the mission of the Stardust probe?

hit comet Tempel 1

visit Halley comet

collect comet Wild 2 dust

deflect Hale-Bopp comet

Question 6 4 pts

In an episode of family guy, there is a reference to a mass suicide that happened in 1997. All the members drank a lethal mixture of phenobarbital and vodka and then lay down to die, hoping to leave their bodily containers, enter an alien spacecraft that was following a comet (the idea was to make it to heave). This comet was making all the headlines.

this was halley comet

this was tempel 1 comet

This was Hale-bopp comet

this was wild-2 comet

Question 7 4 pts

Cassini visited SATurn was was propelled thanks to (see the slide. gravity is a force)

load of plutonium (fission)

5 boosters attached to the probe

load of burning coal

sling shot effect (graivty assist)

Question 8 4 pts

The meteorite that hit the Earth and wipe out the dinosaurs was about

100 million H bombs

1K of TNT

1 atomic bomb

1 H bomb

Question 9 4 pts

Which comet was first recorded in a tapestry

Bennett

Tempel 1

Hale-Bopp

Halley comet

Question 10 4 pts

Comets

have no tail

I fell asleep

have tails regardless of their position on their orbit

have tails only when they get close of the Sun

Question 11 4 pts

Which planet prvented the formation of another planet in the asteroids belt?

Saturn

Jupiter

Venus

Uranus

Question 12 4 pts

Which of the following is furthest from the Sun?

Neptune

Pluto

a comet in the Kuiper belt

an asteroid in the asteroid belt

a comet in the Oort cloud

Question 13 4 pts

We always see the same face of the Moon.

Idk

it depends on the season

True

False

Question 14 0.1 pts

According to the nebular theory, what are asteroids and comets?

- ☐ the shattered remains of collisions between planets
- ☐ chunks of rock or ice that have been expelled from the planets by volcanoes
- ☐ the shattered remains of collisions between moons
- ☐ leftover planetesimals that never accreted into planets
- ☐ chunks of rock or ice that condensed long after the planets had formed

Question 15 0.1 pts

tails of comets are

- ☐ pushed away from the Sun (radiation pressure)
- ☐ comets have no tail
- ☐ spiral around the core of the planets
- ☐ pulled toward the Sun (gravity)

Question 16 4 pts

During a 1938 broadcast, Orson Wells let people believe _____ were invading

- ☐ Vulcanians
- ☐ Venusians
- ☐ Netunians
- ☐ Martians

Question 17 4 pts

Which planet is orbited by the four "Galilean moons" known individually as Io, Europa, Ganymede, and Callisto?

- ☐ Uranus
- ☐ Jupiter
- ☐ Mars

Saturn

Neptune

Question 18 4 pts

The earth is dynamic . It has plate tectonics , earthquakes. The energy comes from

radiation pressure

radioactivity

hot outer core

supernova

Question 19 4 pts

Halley comet is features in the _____ painting

Da Vinci

Raphael

Giotto

Botticelli

Question 20 4 pts

Most rocky planets (inner plates) don't have a signigicant magnetic field except

The EArth

Mercury

Venus

Mars

Question 21 4 pts

Which planet rolls on its orbit like a barrel ?

Jupiter

Saturn

Uranus

Neptune

Question 22 4 pts

The rings of Uranus was discovered when

Giotto visited the planet

light of a star was blocked by the rings

Cassini visited the planet

it was observed from Earth

Question 23 4 pts

The mass of the Moon was computed in 1969 using

third law of Kepler

Newton's third law

There was no landing on the Moon

second law of Kepler

Question 24 4 pts

The Oort cloud is

a region in the same plane as the planets that contains hundreds of thousands of comets.

a circular region between the orbits of Mars and Jupiter that contains most known asteroids.

a vast cloud of gas that encircles the solar system at a great distance from the Sun.

a roughly spherical region larger than the orbit of Pluto that may contain a trillion comets.

the cloud of gas from which the solar system formed.

Question 25 4 pts

For which reasons pluto was demoted?

☐

It is not spherical

☐

It does not orbit a star

☐

it didn't clear out its orbit

☐

I didn't pay attention to the lecture

Question 26 4 pts

The mission DART is designed to

☐

collect samples from a comet

☐

deflect an asteroid from its orbit

☐

crash into Tempel 1 and study its composition

☐

takes pictures of Halley comet

Question 27 4 pts

Which asteroid was promoted to "dwarf planet" status?

☐

Gaspra

☐

Ceres

☐

mathilde

☐

Ida

Question 28 4 pts

What is voyager 2 carrying ?

☐

a stack of pictures for aliens to find

☐

A record of sound and pictures from Earth

☐

a projectile to destroy NEO

a telescope to be deployed around Pluto

Not saved
