Quiz Instructions

Question 1 10 pts

Our Sun peaks in

☐

the red

☐

the green

☐

the blue

☐

the IR

Question 2 10 pts

Luminosity is to start what _____ is to cars

☐

size

☐

color

☐

horse power

☐

tank size

Question 3 10 pts

If an allien lives on oreos and it needs 3 oreos per day to survive. How will it last with 12 oreos.

☐

36 days

☐

12 days

☐

6 days

☐

4 days

**Question 4 10 pts**

The most important stellar parameter is (because it will determine the others)

☐

the rational speed of a star

☐

the mass of a star

☐

the magnetic field of a star

☐

the luminosity of a star

**Question 5 15 pts**

If you split light coming from a star into its constituent wavelengths (colors), you get a stellar spectrum.

The brightest color (Sun is green) / the peak wavelength gives us

☐

the distance of a star

☐

the temperature of a star

☐

the size of a star

☐

the rate of spin of a star

**Question 6 10 pts**

The group of women who classified the stellar spectra were called

☐

the classifiers

☐

the harvard computers

☐

the organizers

☐

the star dusters

☐

the pickering ladies

**Question 7 15 pts**

The light that burns twice as bright, burns ----- as long

☐

one-fourth as long

☐

half as long

☐

one-third as long

☐

twice as long

Question 8 15 pts

Which stellar parameter does not depends on mass? (see slides)

☐

luminosity

☐

chemical composition

☐

color

☐

life span

Question 9 10 pts

We human, peak, in

☐

microwave

☐

infra red

☐

blue visible light

☐

UV
